EAFIT UNIVERSITY

DEPARTMENT OF COMPUTER SCIENCE AND SYSTEMS

PROJECT SELECTION

First Report

Course: Numerical Analysis

Instructor: Edwar Samir Posada

Submission date of this report: February 8, 2026

System name (project):
Project: *DigitalNumbers*

Project website or repository:
`https://github.com/jfelipefg17/ProyectoAnalisisNumerico`

Team members:

- Juan Felipe Florez Giraldo
- Jerónimo Mesa Alzate
- Juan Guillermo Isaza
- Luciana Pineda

Project description:

We will build a self-contained numerical tool using the methods studied in class. The tool will be developed as a web application. The chapter will include methods on single-variable equations, methods for systems of equations, and interpolation methods.

Possible added value:

- English language support

- LaTeX documentation
- Additional coding language
- Additional numerical methods
